

MEETING MINUTES

Date	Thursday 7/4/22
Time	8pm
Attendees	Tom, Calvin, Daniel, Eileen, Aayush
Apologies	
Please bring/read	At least 1 completed function
Meeting purpose	Updates from the team on code / data structure changes
Next meeting	Sunday - 9pm

Agenda

Agenda Item	Minutes
1. Update on Iteration 3 functions	<p>Aj: Basically finished auth/passwordreset/reset, just need another functional aspect Will write passwordreset/request tonight</p> <p>Calvin: Pin & unpin - Work on less deep nesting of for loops</p> <p>Daniel: Completed search/v1 Don't need data_store.set(store) - if you delete, won't change anything Doing standup stuff tonight</p> <p>Eileen: Questions: when someone sends a message or a dm, is how the system sends a message by storing it in the data store? Like does frontend check the data store every second for updates to show updates to message threads etc.?</p> <p>Finished message/sendlater/v1 and message/sendlater</p> <p>Tom: Finished notifications - pretty much done</p>
Issue Boards	- Write up your issue boards: Calvin and Daniel!
Reminder on http endpoints delegation	notifications/get/v1 - tom search/v1 - daniel message/share/v1 - tom message/react/v1 - daniel message/unreact/v1 - daniel message/pin/v1 - Calvin message/unpin/v1 - Calvin message/sendlater/v1 - Eileen
